

CompAssess European project

Oct 16, 2015

The aim of the project CompAssess is to contribute to the EU objectives implementing methodologies and tools for competence assessment among education authorities in the European VET System (Vocational Education and Training). Therefore, international education centers with a solid base on transversal skills and achievements in their methodologies, have met to share and implement their results.

CompAssess project Assessment of student competences with emphasis on the development of competences has been funded with support from the European Commission Erasmus+ and SEPIE .
