

II Coding Dojo of Test Driven Development

Apr 30, 2014

The kata was aimed to students on 3rd year Computer Engineering Degree of the Faculty of Engineering at Mondragon Unibertsitatea. Ruben Egiluz, from the firm eSellerpro, challenged the students to solve a problem in a friendly environment, following the TDD methodology (Test Driven Development)

This Kata has provided to computer engineering degree students expertise in software engineering implementing the TDD methodology, a paradigm that has a growing interest in the industrial environment. The challenge posed by Ruben and the methodology has had wide acceptance among students.
