

## International expert in management Kiyoshi Suzaki at MU

Oct 24, 2013

This conference is part of the program of the 2nd and 3rd edition of the Master in Industrial Operations Management organized by the Faculty of Engineering at Mondragon Unibertsitatea together with the Chamber of Commerce of Bilbao and Asenta Management Consultant.

In opinion of the expert, the main mistakes that companies make are: waste their employees talent; not take into account their employees opinion in the decision making process; give orders without communicating how or why things are done.

Kiyoshi Suzaki
