

Participation of MU at B Awards Competition

Nov 20, 2013

Twenty one students of Industrial Design and Product Development degree from the Faculty of Engineering at Mondragon Unibertsitatea presented five projects at each five categories of the B Awards competition. The categories were habitat, products, visual communication, public spaces and transport and mobility. B Awards adopts the format of a design competition between universities and prestigious training centres like: Beckmans College of Design, Kyoto Institute of Technology, London College of Communication, Politecnico di Milano, UPV-EHU and Tecnum.

Habitat

Saver, created by Enara Agirrezabala, Maitane Garcia, Nere Karrera, Jon Lamborena and David Santamaria.

Products

Nios, created by Irantzu Vegas.

NIOS
NO MORE LIGHT AND SOUND, JUST SLEEP

The original objective was to solve the problem of noise and light in a bedroom. The solution was to create a device that could be placed in a bedroom and used as a pillow. The device is made of a soft material and has a sensor that can detect light and sound. The device is also designed to be used as a travel pillow. The device is made of a soft material and has a sensor that can detect light and sound. The device is also designed to be used as a travel pillow.

MAIN USE

LISTEN TO MUSIC

TRAVEL

COLOURS
