

OUT to the World!

Jul 29, 2014

The number of participants from the Faculty of Engineering at Mondragon Unibertsitatea is about 35% of the people in each class, well above the European "Horizon 2020" objective, 20%, for the year 2020. Most of the students will be attending courses or doing their project at European Universities but there will also be projects in companies.

After some months of uncertainties because of the new regulations, we are happy to say that all Erasmus+ stays will be financed, either with European money from the OAPPE agency or from the Spanish Education Ministry. The results obtained by the engineering students are really remarkable since the Ministry's call was competitive.

Good luck!

OUT to the World!
