

## Visit of lecturers of Faculty of Engineering to Université d'Orléans (France)

Feb 19, 2013

On 6th February, professors José M<sup>a</sup> Canales, Ander Goikoetxea and Fernando Garramiola from Faculty of Engineering were visiting Châteauroux, invited by Université d'Orléans – IUT de l'Indre. During the visit, these professors introduced Mondragon Unibersity's singularity, the cooperativism and Mondragon Corporation. After that, they presented our academic offer, the project based educational model, and the academic offer for exchange students.

Next day they offered a lecture to 60 students from IUT, where they presented Mondragon Unibertsitatea, some of the semestral projects carried out by our Industrial Electronics Bachelor Degree students and Energy and Power Electronics Master Degree students. Some of these projects were “a guided robot”, “an automated greenhouse” and “control of a wind turbine”.

This visit helped strengthen collaboration between Faculty of Engineering and IUT de l'Indre, and set up the contact between other faculties of MU and IUT.
