

## Mondragon Unibertsitatea opens a branch in Bilbao

Mar 22, 2013

Mondragon Unibertsitatea will be present in Bilbao as from the 2013-2014 academic year, thanks to the collaboration agreement reached with the City Council for the creation of Bilbao Berrikuntza Faktoria, an educational centre specialising in innovation and entrepreneurship, where university students, the unemployed as well as companies and organisations will be able to study undergraduate and master's degrees, continuing training programmes, practical work, final year projects, as well as research and transfer activities.

This branch of Mondragon Unibertsitatea in Bilbao will be located in the building currently occupied by Bilbao Ekintza.

MU-BBF (Bilbao Berrikuntza Faktoria) aims to be a real factory of innovation and entrepreneurship. The centre aims to become an important driving force for the economic and social development of the city and an international benchmark in this area.
