

## Arrasate-Mondragon, International Campus

Sep 18, 2013

These foreign students are joining the regular lessons with local students in all knowledge areas but mostly in Informatics and Innovation. Their integration process is intended to be two folded: On one hand, fully integrating them in the course dynamic and activities and, on the other hand, facilitating their social interaction with local students and at the University life. For this purpose, a "Buddy" program has been established to help them settle down and get to know student life in Mondragon. Local students that join the programme are not only awarded 1,5 ECTS but also start creating the links to ease their possible Erasmus stay abroad in the future.

Special mention is due to the Erasmus Mundus fellows within the LAMENITEC project <http://lamenitec.mondragon.edu>. Many of them are enrolled as regular students in Master and Doctorate level and will have the opportunity to get a Mondragon Unibertsitatea Degree at the end of their studies. This long term stay will give the opportunity to sides, student and MU staff, to create long standing bonds for future collaboration.
