

Finalists for the IX Felix Sopelana Awards

Oct 11, 2013

Six final degree projects of the Faculty of Engineering at Mondragon Unibertsitatea aim to get the IX Felix Sopelana award for the best project and the best technical study. The event is organized by COPITIG.

The projects are the following:

- Analysis of a tool supply system. Student: Ander Mujika Urteaga.
- Definition of the process to achieve high resistance layers to the friction by molybdenum projection. Student: Joseba Balerdi Echeverria.
- Automation of the process to manage product documentation dossiers and the process to homologate valves. Student: Josu Sarraoa Arsuaga.
- Topographic analysis of dental implants. Student: Nielka Iburguren Mugica.
- System to check the manufacturing of elevator maneuver items in a PC environment. Student: Asier Abalos Legazpia.
- Hardware in the loop and Rapid Control Prototyping using Labview. Student: Arrate Igarza Lopetegi.
