

## 8 Business Administration students have participated in an european program in Austria.

Apr 03, 2014

‘Bridging the gap’ is an intensive program organized by six universities from five different countries:

- Artesis Hogeschool Antwerpen (Belgium)
- Central Ostrobothnia University of Applied Sciences (Finland)
- FH-Joanneum (Austria)
- HEPH-Condorcet (Belgium)
- Mondragon Unibertsitatea - Business Faculty (Basque Country – Spain)
- Hacettepe University (Turkey)

Artesis Hogeschool Antwerpen was our host last year, and this edition FH-Joanneum has been hosting the program. The aim of this IP is to boost interdisciplinary spaces by identifying common goals between Business Management and IT students. These two professional profiles are known to misunderstand each other once they are working at the same company. Therefore, in this program they have to manage to bridge the gap through different activities.

The IP(Intensive Program) is an enriching learning experience, not only in terms of professional issues but also (and mainly) related to personal aspects.
